PROFESSIONAL EXPERIENCE

● Software Engineer

LIVETILES

2018 - Current

Primarily tasked with developing **Vue** & **React** web apps for customer sites & intranets (SharePoint) in a single & multiple tenancy **Azure** environment. Leading all frontend development projects within the LiveTiles Sligo team & mentoring junior developers. Also improving our core API layer built on **.NET Core 3 MVC** and updating our **Angular** dashboard components.

Highlighted Project: Building a full SASS web app that would manage the creation of SharePoint subsites & MSTEams groups.

● Graphic Designer & Web Developer

BALLAST SIGNS

2017 - 2018

Creating signage for customers using **Adobe CC (Ps, Ai, In, Xd)** from digital branding assets to large scale billboards, posters, plaques, vinyl wraps to clothing articles. Maintaining the company **WordPress** website and implementing bug fixes & template updates.

Highlighted Project: Designing a new brand logo & studio layout for the company office including vehicle wraps, wall decals and website updating.

● Multimedia Developer

TELEMETRYTV (REMOTE WORK)

2016 - 2017

Website maintenance & bug fixing, developing digital signage templates using **Adobe CC** & making improvements to our **React** template designer & editor components.

Highlighted Project: Being part of the team that improved our Web Component **SASS** approach to a more structured **BEM** style.

● Front-End Developer

NAV.CO (REMOTE WORK)

2015 - 2016

Primarily creating various **React** & **Vue** web apps for client websites. Cross browser testing with **BrowserStack** & improving **JavaScript** performance bundling to implementing better **Polyfill** inclusions for older browsers.

Highlighted Project: Building a proposals WP Plugin that was viewable across multiple devices in a responsive manner.

● Web Developer & Designer

QUICK BROWN FOX

2011 - 2014

Designing, developing & maintaining customer websites from the ground up. Full brand re-designs, SEO work, photo retouching & client CMS training. Updating & building WordPress plugins to designing logo's using **Adobe CS** tools.

Highlighted Project: Developing a **Single Page Application** mortgage calculator for a local Credit Union in **jQuery**.

● Junior Web Developer

RYANAIR

2008 - 2011

Maintaining the company website, implementing bug fixes & improvements to display airline fares across our web apps. Interacting with our design team to build low/high fidelity **prototypes**.

Highlighted Project: Driving the technical re-structure from an ad-hoc development process to a more structure approach using **Git** & **TortoiseSVN** for source control & PHP Zend Framework with **Jasmine** & **Mocha** for testing our **Web Components**.

EDUCATION

● Hons. Degree Web Engineering

DÚN LAOGHAIRE INSTITUTE OF ART, DESIGN AND TECHNOLOGY (IADT)
